ECO-FRIENDLY SOLUTIONS

PowerliftX Forklifts Redefining Sustainability
in Material Handling

LPG-powered forklifts, utilizing liquefied petroleum gas, offer a versatile and efficient solution for material handling needs in various industries. These forklifts combine the benefits of propane's clean-burning properties with the power necessary for heavy-duty lifting tasks.

LPG forklifts typically have lower maintenance costs and longer engine life due to cleaner combustion resulting in reduced downtime and greater operational efficiency over the long term.

With lower emissions compared to traditional gasoline or diesel counterparts, LPG forklifts provide a more environmentally friendly option without compromising performance.

Operator Presence Sensing System (OPS)

The forklift automatically stops when the operator is not present on the seat, ensuring safety at all times.

Advanced Vehicle Control Component

This high-power control unit allows multiple engines and electronic actions to operate simultaneously, continuously regulating and optimizing performance for industry-leading power and fuel efficiency.

Tight Chassis Design

The fully sealed underside reduces the risk of damage from foreign objects like shrinkwrap entering the engine compartment. It also minimizes noise and eliminates safety issues caused by airborne dust particles.

Industrial-Grade Engine

Designed for industrial use, this engine delivers high torque and power at low revolutions, ensuring a long reliable life with exceptional performance and the lowest possible fuel consumption.

Engine Protection System

To safeguard the engine, the protection system offers two levels of defense during overheating. First, it slows down the machine, and then it shuts it down to prevent damage.

High Vision Mast

Clear visibility through the mast is crucial for safe forklift operation. The PowerLiftX offers excellent visibility, enhancing safety and reducing damage costs.

Fully Floating Dynamic System

The dynamic system separates the chassis from road impacts, ensuring smoother operation. It also protects the transmission and chassis during extended use in challenging environments.

LIFT X

LPG Forklifts

The PowerLiftX LPG Forklifts are engineered to maximize operator productivity while minimizing running costs. This forklift sets the highest standards for IC engine counterbalance trucks, combining innovative fuel economy with durable components and a low-maintenance design.

It's an investment that makes perfect business sense, offering a suite of advanced features as standard, delivering true value for money.
